SAN RAMON, May 8th -- Amcom Technology has successfully implemented our first Disaster Recovery site.

Amcom Technology has been involved in a multi-phase project with client Old Republic Home Protection to build up their infrastructure to handle a minor or major disaster. They can now sustain Business Continuity from a network infrastructure perspective for their mission critical applications. Amcom Technology has played a vital role in the recommendation, purchasing, configuration, and implementation of all of ORHP's hardware and systems.

Amcom Technology is a member of the Amcom companies located in the San Francisco Bay Area (San Ramon). The company provides premium end-to-end technology services from Web 2.0/RIA software development, to network infrastructure and business intelligence.
